

REMARKS/ARGUMENTS

New claim 18 has been added. Claims 11 - 18 are pending in the application.

In the Advisory Action and in the "Response to Arguments" section thereof, the Examiner noted that:

Based on the above stated "motherboard" analogy, it appears Applicants desire to define their invention as a board to which ball grid integrated circuit packages are to be mounted thereon. However, there is not what is reflected in the current claim language. If Applicants intend to make this distinction it should be expressly stated in the claim language.

Claim 11, the claims dependent thereon, and claim 17 have been amended to reflect this fact. New claim 18 is directed to the combination of applicants' novel PC wiring board and at least one BGA package mounted thereon.

In view of the above, further and favorable action is respectfully requested.

A Request for Continued Examination (RCE) is being filed concurrently herewith.

Respectfully submitted,

Jim Zegeen
